

INSTRUCTIONS:

Fill out the hazard analysis and risk assessment below.

HA-001 should be for the lane departure warning function as discussed

HA-002 should be for the lane keeping assistance function as discussed

Then come up with your own situations and hazards for the

When finished, export your spreadsheet as a pdf file so that

lane assistance system. Fill in the HA-003 and HA-004 in the table below so that a reviewer can easily see your work.

| Situational Analysis | | |
|----------------------|--------------------------|-------------------------|
| Situation Details | Other Details (optional) | Item Usage (function) |
| SD03 - High speed | | IU01 - Correctly used |
| SD03 - High speed | | IU02 - Incorrectly used |
| SD03 - High speed | | IU01 - Correctly used |
| SD03 - High speed | | IU01 - Correctly used |

rows.

| Situation Description | Function |
|---|---|
| Normal driving on a highway during rain (slippery road) with high speed and correctly used system. | Lane Departure Warning (LDW) function shall apply an oscillating steering torque to provide the driver with haptic feedback |
| Normal driving on a country road during normal conditions with high speed (the driver is misusing the function as a fully autonomous function). | Lane Keeping Assistance (LKA) function shall apply the steering torque when active in order to stay in ego lane |
| Normal driving on a highway during rain (slippery road) with high speed and correctly used system. | Lane Keeping Assistance (LKA) function shall apply the steering torque when active in order to stay in ego lane |
| Normal driving on a city road during normal conditions with high speed and correctly used system. | Lane Departure Warning (LDW) function shall apply an oscillating steering torque to provide the driver with haptic feedback |

| Hazard Identification | | |
|----------------------------------|--|---|
| Deviation | Deviation Details | Hazardous Event (resulting effect) |
| DV04 - Actor effect is too much | Warning function applies an oscillating torque with very high torque (above limit). | EV00 - Collision with other vehicle |
| DV03 - Function always activated | The Lane Keeping Assistance function is always activated which tempts the driver to misuse | EV00 - Collision with other vehicle |
| DV04 - Actor effect is too much | The Lane Keeping Assistance function is providing too much additional torque. | EV03 - Car spins out of control |
| DV11 - Actor effect is wrong | The Lane Departure Warning function applies an uneven oscillating torque. | EV-02 - Side collision with other traffic |

| Event Details | Hazardous Event Description | Exposure (of situation) |
|--|--|-------------------------|
| High haptic feedback can affect driver's ability to steer as intended. The driver could lose control of the vehicle and collide with another vehicle or with road infrastructure. | The Lane Departure Warning function applies an oscillating torque with very high torque (above limit). | E3 - Medium probability |
| The continuous activation of the Lane Keeping Assistance function could make the driver misuse it as a fully autonomous function and take both hands of the steering wheel, which could lead to accidents. | The Lane Keeping Assistance function is always activated. | E2 - Low probability |
| Too much added torque from the Lane Keeping Assistance function can make the car go out of control. | The Lane Keeping Assistance function provides too much additional torque. | E3 - Medium probability |
| Uneven applied oscillations would make the car drifts to one side causing collisions with nearby traffic. | The Lane Departure Warning function applies an uneven oscillating torque. | E4 - High probability |

| Hazardous Event Classification | | |
|--|---|--|
| Rationale (for exposure) | Severity (of potential harm) | Rationale (for severity) |
| Driving on a highway during rain happens quite often. | S3 - Life-threatening or fatal injuries | Accidents at high speed can cause fatal injuries and could be life-threatening |
| Misusing the system on a country road doesn't happen most of the time. | S3 - Life-threatening or fatal injuries | Accidents at high speed can cause fatal injuries and could be life-threatening |
| Driving on a highway during rain happens quite often. | S3 - Life-threatening or fatal injuries | Accidents at high speed can cause fatal injuries and could be life-threatening |
| Driving on a city road in normal conditions happens almost every day. | S3 - Life-threatening or fatal injuries | Accidents at high speed can cause fatal injuries and could be life-threatening |

| on | | Determinati |
|---|--|---------------------------|
| Controllability (of hazardous event) | Rationale (for controllability) | ASIL Determinati on |
| C3 - Difficult to control or uncontrollable | When the steering wheel vibrates excessively for a long time, most drivers will find difficulty controlling the vehicle in this situation. | C |
| C3 - Difficult to control or uncontrollable | When the driver misuses the system as fully autonomous and takes both hands of the steering wheel, controlling the car will be then difficult. | B |
| C3 - Difficult to control or uncontrollable | Excessive added torque could make the car slip on the rainy road which will make it difficult to control. | C |
| C2 - Normally controllable | The driver can notice when the car starts drifting away from the lane, and should be able to control it normally to get it back to the center of the lane. | C |

| ion of ASIL and Safety Goals |
|------------------------------|
|------------------------------|

| Safety Goal |
|-------------|
|-------------|

| |
|---|
| The oscillating steering torque from the lane departure warning function shall be limited |
|---|

| |
|---|
| The Lane Keeping Assistance function shall be time limited and the additional steering torque shall end after a given time. |
|---|

| |
|---|
| The Lane Keeping Assistance function shall provide an additional torque with a small threshold. |
|---|

| |
|---|
| The Lane Departure Warning function shall provide an even oscillating torque to avoid car drifting. |
|---|

| Hazardous I | |
|---|----------------------------------|
| Rationale (for exposure) | Severity (of potential harm) |
| night driving in the city is a regular activity | S1 - Light and moderate injuries |

| Hazardous I | |
|---|---|
| Rationale (for exposure) | Severity (of potential harm) |
| night driving in the city is a regular activity | S1 - Light and moderate injuries |
| completely unilluminated roads | S1 - Light and moderate injuries |
| driving, however, heavy snow | S3 - Life-threatening or fatal injuries |
| country driving is part of regular driving | S3 - Life-threatening or fatal injuries |
| driving, however, heavy snow | S3 - Life-threatening or fatal injuries |

| Event Classification | |
|---|---|
| Rationale (for severity) | Controllability (of hazardous event) |
| In city traffic, speed of vehicle is expected to be low | C0 - Controllable in general |

| Event Classification | |
|--|---|
| Rationale (for severity) | Controllability (of hazardous event) |
| In city traffic, speed of vehicle is expected to be low | C0 - Controllable in general |
| In city traffic, speed of vehicle is expected to be low | C1 - Simply controllable |
| On highway speed of vehicle is expected to be high | C2 - Normally controllable |
| On country roads speed of vehicle is expected to be high | C1 - Simply controllable |
| On country roads speed of vehicle is expected to be high | C3 - Difficult to control or uncontrollable |

| | Determination of ASIL and Safety Goals | |
|--|--|--|
| Rationale (for controllability) | ASIL Determination | Safety Goal |
| control the situation by applying brakes and there is additional illumination on | QM | total LOSS of beam shall be prevented |

| | Determination of ASIL and Safety Goals | |
|--|--|--|
| Rationale (for controllability) | ASIL Determination | Safety Goal |
| control the situation by applying brakes and there is additional illumination on | QM | total LOSS of low beam shall be prevented |
| drivers usually drive at lower end of city speeds and on road and hence >90% | QM | total LOSS of low beam shall be prevented |
| drivers are able to brake and control the road, it will be difficult for the average | A | total LOSS of low beam shall be prevented |
| road, it will be difficult for the average | B | total LOSS of low beam shall be prevented |
| road, it will be difficult for the average | B | total LOSS of low beam shall be prevented |

Exposure

| ID | Description |
|----|----------------------|
| E0 | Incredible |
| E1 | Very low probability |
| E2 | Low probability |
| E3 | Medium probability |
| E4 | High probability |
| | |

Severity

| ID | Description |
|----|--------------------------------------|
| S0 | No injuries |
| S1 | Light and moderate injuries |
| S2 | Severe and life-threatening injuries |
| S3 | Life-threatening or fatal injuries |
| | |

Controllability

| ID | Description |
|----|--|
| C0 | Controllable in general |
| C1 | Simply controllable |
| C2 | Normally controllable |
| C3 | Difficult to control or uncontrollable |
| | |

| Duration (of situation) |
|---------------------------------------|
| |
| Not specified |
| <1 % of average operating time |
| 1 % to 10 % of average operating time |
| >10 % of average operating time |
| |

| Remarks |
|--|
| No injuries |
| Light and moderate injuries |
| Severe and life-threatening injuries (survival probable) |
| Life-threatening injuries (survival uncertain), fatal injuries |
| |

| Remarks |
|---|
| Controllable in general |
| 99 % or more of all drivers or other traffic participants are usually |
| 90 % or more of all drivers or other traffic participants are usually |
| Less than 90 % of all drivers or other traffic participants are usually |
| |

| Frequency (of situation) | Reference |
|--|---|
| | E0 - Incredible |
| Occurs less often than once a year for the great majority of drivers | E1 - Very low probability |
| Occurs a few times a year for the great majority of drivers | E2 - Low probability |
| Occurs once a month or more often for an average driver | E3 - Medium probability |
| Occurs during almost every drive on average | E4 - High probability |
| | |

| Probability of Injuries | Reference |
|--|---|
| AIS 0 and less than 10 % probability of AIS 1-6 | S0 - No injuries |
| More than 10 % probability of AIS 1-6 (and not S2 or S3) | S1 - Light and moderate injuries |
| More than 10 % probability of AIS 3-6 (and not S3) | S2 - Severe and life-threatening injuries |
